Place of birth: Bologna, Italy

ABOUT ME

I am driven by a key question: how can organisations use technology to make better decisions while protecting data and trust? My interests sit at the intersection of AI, data, technology governance, organisational decision-making and digital policy. Guided by curiosity, purpose and steady improvement, I aim to turn complex technical and regulatory challenges into clear, practical solutions, helping shape digital systems that are secure, responsible and useful in real-world settings.

EDUCATION & TRAINING

[15/09/2025 - Current]

Master in Computer Science

University of Bologna

City: Bologna | **Country:** Italy | **Level in EQF:** 7

Main subjects: Systems and Networks, Digital Forensics, Artificial Intelligence, Database Complements, Deep Learning, Computational Imaging and Computational Mathematics.

Technical areas: computer systems and networks, digital forensics, AI, databases and computational methods.

[27/08/2026 - 17/01/2027]

Erasmus+ Exchange Program in Computer and Systems Sciences

Stockholm University

City: Stockholm | **Country:** Sweden | **Level in EQF:** 7

Software Security (secure software lifecycle, vulnerability analysis, verification and testing); Information Security in Organisations (information-security risk analysis, policies, controls and ISO/IEC 27000-series standards); Internet of Things Services (IoT applications, services, communication and smart-object integration); Research Topics in Data Science (machine learning, data mining, research methods, interpretability, reproducibility, bias, fairness and robustness).

Full-time exchange semester (30 ECTS).

[15/09/2022 - 29/10/2025]

Bachelor in Information Science for Management

University of Bologna

City: Bologna | **Country:** Italy | **Level in EQF:** 6

Main subjects: algorithms, operating systems, networks, databases, software engineering, web and mobile development, machine learning, cybersecurity, management, economics, business organisation and Internet Law.

Occupational skills: software development, work with databases and information systems, and analysis of technical requirements in organisational and regulatory contexts.

Thesis: “Organizational Implications of the NIS2 Directive: The Support of International Standards and the Strategic Role of the CISO in Implementing the Regulation”.

Final grade: 110/110 cum laude.

[15/09/2017 - 04/07/2022]

High School Diploma in Applied Sciences

Liceo Scientifico Enrico Fermi

City: Bologna | **Country:** Italy | **Level in EQF:** 4

Main subjects: applied sciences within a scientific upper-secondary programme.

Skills developed: scientific reasoning and application of scientific methods to practical problems.

Final grade: 100/100 with honours.

WORK EXPERIENCE

OLIO SB srl

City: San Lazzaro di Savena (BO) | **Country:** Italy

[13/02/2025 - 24/04/2025]

Software developer

- Developed and maintained frontend and backend features for the company’s e-commerce management system, supporting order processing, administration and warehouse operations.
- Integrated external APIs, including Linear and automotive parts suppliers; automated data exchanges; created and updated backend controllers and services.
- Improved database performance through indexing and data cleanup. Analysed data to identify potential improvements and useful features.
- Built and updated responsive interfaces for warehouse movements, returns, quality control and ticket management; added views displaying business statistics
- Worked with IT and administrative colleagues on software requirements, task planning and Agile business planning.

Tech stack: JavaScript, Node.js and AdonisJS.

SKILLS

debug software | design user interface | integrate system components | use databases | use query languages | use software libraries | use object-oriented programming | Java (computer programming) | JavaScript | Python (computer programming) | PHP | TypeScript | identify customer requirements | interpret technical requirements | perform data analysis | perform scientific research | machine learning | deep learning | statistics | data analytics | computer forensics | apply digital security measures | ICT security legislation | principles of artificial intelligence | English

LANGUAGE SKILLS

Mother tongue(s): Italian

Other language(s):

English

LISTENING: C2 **READING:** C2 **WRITING:** C1

SPOKEN PRODUCTION: C1 **SPOKEN INTERACTION:** C1
